

**Components Needed:**

- Halloween Skull Plastic
- RGB Controller
- 4 Intelligent Pixel Strands 50ct
- 2 Intelligent Extensions

**Step 1: Install Lights**

From the back (picture to the left shows front view) begin pushing the lights through the corrugated plastic following the path for each run as shown.

Always start with the beginning of the strand which is the end with the male plug.

Each run will use two strands which are connected end to end.

Start 1 run will connect to output 1 on the controller and Start 2 run will connect to output 2 on the controller.

**Step 2: Setup Controller**

There is timing in WowLights V2 Pro and Pro Plus Halloween Sequences for a Halloween Skull on a RGB Pixie Controller ID #1C. You can set the ID using the switches on the board:

Controller #1C – 0001 1100 (Switches 4, 5, & 6 ON, all others OFF)
