START

Kit Includes:
Wreath Plastic
50ct Intelligent Pixels x3

Step 1: Install Lights

From the back (picture to the left shows front view) begin pushing the lights through the corrugated plastic following the path as shown. The wreath will use a total of 3 strands, connected end to end.

Step 2A: Configure Controllers & Connect Lights (E1.31)

There is timing for a RGB Wreath in WowLights Pro Layout Christmas sequences. Configure the controller as shown below and connect the lights to output #1.

Advanced Output Configuration — □ ×

Outputs 1 - 4

	Start Universe	Start Channel	End Universe	End Channel	Num Pixels	Null Pixels	Zig Zag	Group	Intensity Limit (%)	Reversed
Output 1	170	1	170	450	150	0	0	1	100	●
Output 2	1	1	1	150	50	0	0	1	100	●
Output 3	1	1	1	150	50	0	0	1	100	●
Output 4	1	1	1	150	50	0	0	1	100	●

☐ Automatic Sequential Channels   ◉ Tab Down   ○ Tab Right   [Cancel] [OK]

Step 2B: Configure Controllers & Connect Lights (Pixie)

To setup the wreath to run on a Pixie controller, first update the settings in the preview to the following (change DMX to LOR and set the Start Unit ID to 49). Connect the lights to output #1.

| | LOR ⌄ | | Max Circuit | 510 ⬍ | | |

○ Enter channel on first row, auto-number the rest
○ Enter a channel on every row
☐ Separate Unit ID for each RGB string

		Network	Start Unit ID	Start Circuit	End Unit ID	End Circuit	
▶	1	Reg... ⌄	49	1	49	150	
	2	Reg... ⌄	49	151	49	300	
	3	Reg... ⌄	49	301	49	450	

Then set the ID of the Pixie Controller to 49 using the switches on the board:

Controller #49 – 0100 1001 (Switches 2, 5 & 8 ON, all others OFF)
